

HIGH SCHOOL HEALTH

Grade Level: High School 9-12

Instructor: Ms. Pitzer

Conference Time: 8:25-9:06

Course Description: Health is an integral part of the High School curriculum that enables students to develop an understanding of attitudes and behaviors patterns, which contributes to personal, family, social, emotional, and community health. Some of the topics that students are taught include human behavior, diseases, first aid and safety, disabling conditions, nutrition, legal and illegal drugs, human sexuality, body systems, stress management and interrelationship of personal, family, school, community and world health.

Also, refer to the National Standards for Health Education.
